

Scenario 1: Inayat AI Solutions Overview

Inayat AI Solutions is a next-generation software intelligence firm established in 2024. The company specializes in creating Agentic Retrieval-Augmented Generation (RAG) systems. Our headquarters are located in Mumbai, India, with regional satellite offices in Bangalore and Pune.

Core Products:

1. Inayat Core: The fundamental agent reasoning engine designed for real-time natural language processing.
2. Inayat Agent: A custom frontend application wrapper enabling drag-and-drop document indexing and interactive user chats.
3. Inayat Memory: A unified profile personalization engine that remembers user configurations and preferences across sessions.

Key Contacts:

- Director of AI Research: Dr. Ananya Sharma (ananya@inayat.ai)
- Head of Security Systems: Mr. Rohan Verma (rohan.v@inayat.ai)
- Customer Support Desk: support@inayat.ai

Target Audience:

Inayat's core RAG products are built specifically for enterprise clients who require offline document parsing, personalized search assistants, and interactive knowledge graph visualizations without exposing sensitive data to third-party public models.
